Percentage: 90.60

PROJECTS

Pizza Hut

Technologies used: Java EE, MySQL, ReactJS, RESTful API

This project creates an online ordering system for Pizza Hut. Customers can easily browse, customize, and order pizzas. The system streamlines order management, improving efficiency for Pizza Hut. This enhances convenience for customers and expands Pizza Hut's reach.

Java-based Console Application for Movie Reviews

Technologies used: Java, JDBC, MySQL

A robust database design using MySQL. Functionalities like user-authored reviews, input validation, and efficient CRUD operations.

Website for AnuDeep Industries

Technologies used: HTML, CSS, Tailwind CSS, JavaScript, NodeJS, ExpressJS

A website for an Ichalkaranji based company specialising in agriculture services. The site will serve as a platform to showcase their extensive range of services.

TECHNICAL SKILLS

Programming Languages: Java, C++, JavaScript

Web Technologies: HTML, CSS, ReactJS, JSP, Spring

Tools: Git, GitHub, Eclipse, VS Code, Visual Studio 2022

Database: MySQL

Soft Skills: Problem Solving, Teamwork, Time Management, Good Communication

ACHIEVEMENTS

Successfully Completed - Sunbeam Hackathon 2024 

Published the Research Paper on topic: A Survey of Blockchain Technology 

Won sub-district level football competition three years in a row

COURSES/CERTIFICATES

Certified Java Full Stack Professional - Capgemini College Connect  (EduBridge)

SQL  (Udemy)
